

Parent feedback after
their children's first few
weeks in Reception

My child has absolutely loved her time in school and is thriving so much. She has learnt so much already and I am so comfortable with her coming to your school!

My daughter loves it. She attended the nursery so was happy to go back and see familiar faces.

My son absolutely loves school he is so happy he is in the school environment with teachers and friends.

He loves it. He's known it would be his school since being a baby and has walked his brother to school every day for the last 2 years. He runs in!

My son finds it hard to sit in one place and be "one of the children" as he is a strong individual and an active kid. But he enjoyed making new friends and is happy to talk about his school day.

He seems to like it so far; he talks about having friends and having fun at school. as long as he is happy, I am happy

She has settled in really well; gets very excited every time she comes home with a sticker!

My daughter likes going to school, meeting school staff and new friends. She finds it pretty much the same as preschool because teachers and assistants are doing their best for a smooth transition

My daughter is so happy in her new class, she always talks about her friends and teachers. And the food too!!

They are having the time of their life!

Settled really well enjoying learning and meeting new friends
